

Literacy Connections

Highland Elementary Literacy Team is working towards two main goals:

- Instill a love for reading and writing within our students
- Build a home-school connection in the area of literacy

To help reach these goals we will be implementing monthly literacy-based activities at school. These activities will include things such as author visits, read and feeds, letter writing, book chats, etc. Throughout this process we will be sharing event information with families to allow parents to participate in the activities and facilitate conversation with your student(s).

We will share literacy ideas with you and we encourage families to share ideas with us. We know that many creative and fun literacy based activities are occurring at home, and we would love to hear about them. On the attached form please share some of the activities that you do with your student(s) at home.
